Summary

Junior Full-Stack Developer with hands-on experience building and deploying web applications using Python (Django). Contributed to production systems serving thousands of daily users, with a focus on backend development, database performance, and real-time features.

Experience

Software Engineer (Junior) 2025-08 – Present
ITSS Paris Casablanca, Morocco

- Contributed to backend development of Django-based platforms, including IJConnect (~5K daily users).
- Improved performance of database-heavy pages by identifying bottlenecks (AWS RDS insights) and applying indexing and query optimizations, reducing load times from several minutes to ~30 seconds.
- Implemented real-time notifications using WebSockets and integrated chat via a Matrix server.
- Participated in client communication, requirement estimation (chiffre), development, and deployment.
- Worked across multiple client projects in a multi-tenant environment.

Software Engineer Intern 2025-02 – 2025-07
Lear Corporation Kenitra, Morocco

- Developed a proof-of-concept defect detection system using YOLO and OpenCV (~77% precision / 75% recall).
- Built dashboards to visualize production KPIs (defect rate, throughput, downtime).
- Contributed to MVP tools supporting digitalization of internal workflows.

Freelance / Contract Developer 2025-01 – 2025-02
Twins Groupe Fes, Morocco

- Implemented a search feature using Apache Solr in a Drupal-based platform.
- Supported backend development and templating tasks during a short-term engagement.

Education

State Engineering Degree in Computer Science – Specialization: Information Systems and Decision Support 2020 – 2025
ENSA Tetouan Tetouan, Morocco

Technical Skills

Backend & APIs: Python (Django), REST APIs, WebSockets
Databases: PostgreSQL, MySQL, query optimization, indexing
Data Engineering & AI: Airflow, dbt, GCP, YOLO, OpenCV
Web: JavaScript, React (basic), HTML, CSS
Cloud & Tools: Google Cloud Platform, Docker, Git

Languages

Arabic (Native) French (C1) English (C1)
